

Artificial Intelligence and India - Sample Knowledge PDF

Artificial Intelligence (AI) is a technology that enables machines to simulate human intelligence. AI systems can learn from data, recognize patterns, understand language, and make decisions. AI is widely used in healthcare, education, banking, transportation, and customer support.

India's capital is New Delhi. India became independent on 15 August 1947. The Constitution of India came into effect on 26 January 1950. India is one of the fastest growing technology markets in the world.

Machine Learning is a subset of Artificial Intelligence. It allows systems to improve automatically through experience and data analysis. Deep Learning is a branch of Machine Learning based on neural networks.

Technology	Use Case
AI Chatbots	Customer Support
Machine Learning	Predictions and Recommendations
Computer Vision	Image Recognition
Speech Recognition	Voice Assistants

Sample Questions: 1. What is Artificial Intelligence? 2. What is Machine Learning? 3. What is the capital of India? 4. When did India become independent? 5. Where is AI used?
